BLANCO
PROFESSIONAL

CONVENIENCE ON A CONVEYOR.

Practical solutions for your food distribution during temporary storage, portioning, transport and serving with Cook & Chill and Cook & Serve.

BON APPETIT

First-class solutions for Cook & Chill and Cook & Serve: skilfully cooked food should still taste great when it reaches your guests. The high quality assistants for storage, portioning, transport and serving by BLANCO Professional are always on hand to help.

In food distribution, several work procedures need to be aligned in a perfect process. Product solutions by BLANCO Professional help you to organise your processes in a safer and more efficient manner every day.

The main question is how it gets there.

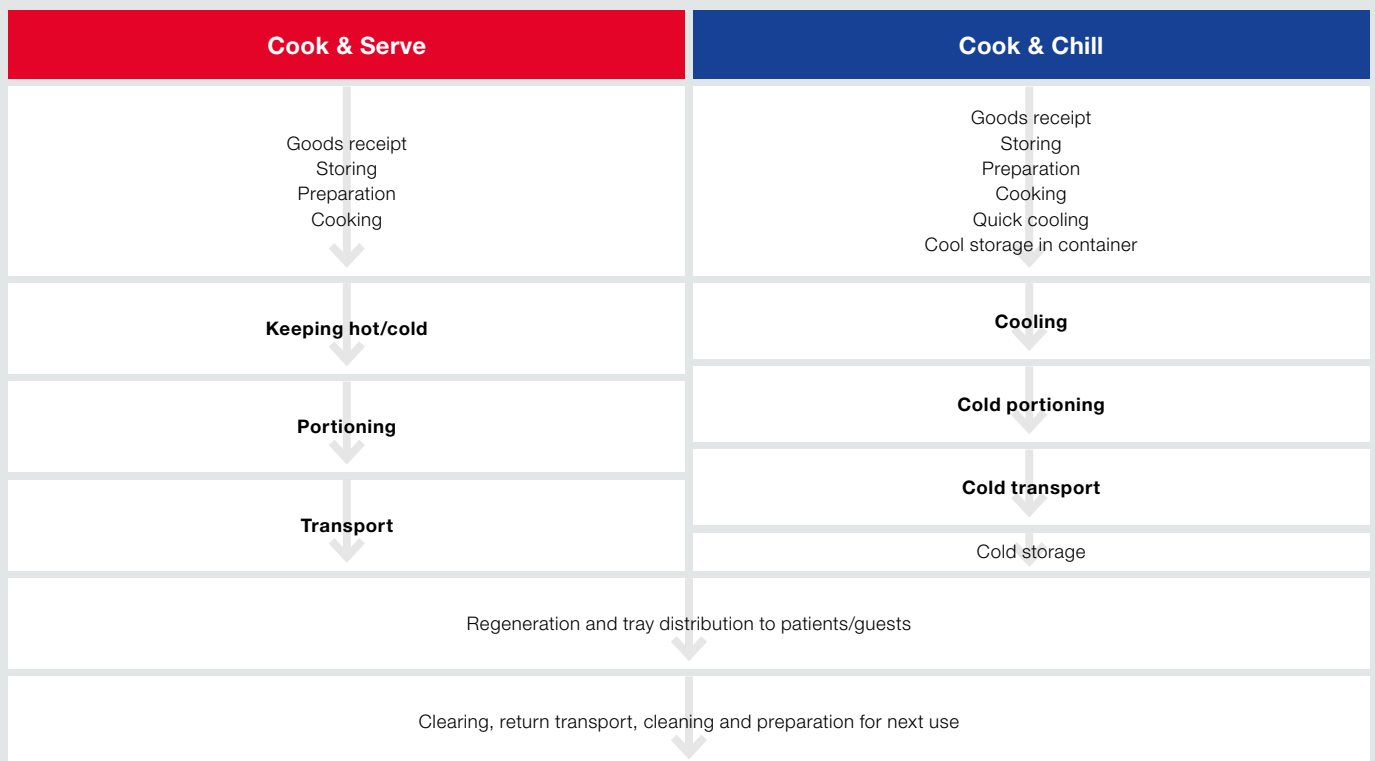

For hospitals, elderly and care homes, schools and nurseries, the demand for healthy, nutritious and appetising food is growing.

Whether Cook & Serve or Cook & Chill, tray or ladling system, with the customised products and systems by BLANCO Professional, you can offer your guests top food quality.

Improving processes and increasing efficiency.

If desired, an analysis of your requirements and careful consulting can be included in the service package. The ergonomic design and first-class processing of our products from high-quality, hygienic materials facilitate the everyday work of staff. And that's not all: in the long run, they promote healthy business development.

With BLANCO Professional, you opt for perfectly aligned products to optimise your processes. They make it much easier to serve tempting, tasty food to your guests – efficiently in a cost- and quality-conscious manner.

The fine art of quality-conscious food distribution: providing good food to large numbers of people at the same time is always a challenge. The product portfolio by BLANCO Professional helps you to create an effective and efficient work process whilst complying with HACCP temperature regulations. With Cook & Serve and Cook & Chill. From basic solution to high-end scenario.

COOK & SERVE

When it comes to fresh food, it's all about speed: the perfectly coordinated team by BLANCO Professional ensures smooth work processes and top food quality.

Tray transport trolley

TTW-PK 20-115 DZE, loaded with eutectic plates

Shelf trolley

RWR-VP 163 for pre-portioned cold components like desserts or salads

Basket dispenser

SAW 3

Plate dispenser

TS-UH2 18-33 for keeping hot and destacking main course plates

Keeping hot, cooling, portioning and transporting – in order to guarantee the quality and freshness of food with Cook & Serve, the required temperature must be maintained at every step of the distribution process. Speed is the decisive factor for food quality – in other words, a seamless transport and portioning process. Sensibly coordinated products and cutting-edge technology by BLANCO Professional enable an optimal workflow.

Especially during food transport and food serving, the best insulating properties and excellent handling are required. With the BLANCO tray transport trolleys, portioned food can be brought safely and quickly to your guests. If you serve in a lading system, the versatile food serving trolleys are on hand to offer reliable assistance during transport and serving.

COOK & CHILL

Portioning in cooled rooms: rugged equipment by BLANCO Professional for classic cold portioning.

When portioning in cooled rooms, dispensers and conveyors without additional cooling technology are enough to ensure an HACCP-compliant work process.

For temporary storage, transport, preparation and portioning in cooled rooms, BLANCO Professional offers a practical range of food distribution conveyors, rugged dispensers and mobile assistants like serving and shelf trolleys.

Ergonomic details support your employees during an efficient work process. First-class processing and high-quality stainless steel ensure a long operating life and optimal hygiene.

In platform, basket and plate dispensers with cooling slits, the cooled dishes are ready for use. Pre-portioned food components like desserts or salads can be temporarily stored in the agile shelf trolley and wheeled directly from the refrigerated room to the conveyor.

Whether flat-belt or round-belt conveyor: you can select the desired conveyor speed from 2.5 to 12 metres per minute. And therefore precisely optimise it for your portioning process.

With Cook & Chill, maintaining the required cooling temperatures presents the biggest challenge. Thanks to products by BLANCO Professional, you can choose between numerous portioning models – to match your spatial conditions, budget and food quantity. For example:

1. Portioning in cooled rooms
2. Portioning at room temperature
3. Portioning at room temperature as a high-end solution

COOK & CHILL

**Portioning at a pleasant room temperature:
the solution for cold loading on the conveyor.**

If no cooled portioning room is available or if portioning is to be carried out at a pleasant room temperature for the sake of your employees, the convection-cooled dispensers and serving trolleys by BLANCO Professional are just the ticket. Whether pre-portioned or in containers: with the convection cooling that can be regulated down to the degree, food stays in the HACCP-compliant range until it is distributed on the conveyor.

Dishes like plates or soup or stew bowls can be stored in the functional dispensers with cooling slits until shortly before they are needed in the refrigerated room – the pre-cooled dishes also help you to maintain the required food temperatures during portioning.

The speed of the flat-belt or round-belt conveyors by BLANCO Professional can be precisely adjusted to your workflow (2.5–12 m/min). High-quality stainless steel and quality-conscious processing also ensure simple cleaning and first-class hygiene standards.

COOK & CHILL

High-end for HACCP: portioning at a pleasant room temperature with the RSPV-UK convection-cooled food distribution conveyor.

Portioning at room temperature allows you complete freedom in the choice of portioning room. For maximum temperature safety and a continuous cooling chain, the convection-cooled food distribution conveyor by BLANCO Professional is on hand to help – the premier class of portioning at normal room temperature. The cooled air curtain keeps the food on the conveyor

at an ideal temperature even during portioning, thus guaranteeing continuous compliance with HACCP regulations.

The cooling stations for shelf trolleys or universal dispensers provide a powerful addition, even for large amounts of food or dishes. With integrated convection cooling or connected to a custom-

er-supplied refrigeration system, they are perfect for cooling dishes and keeping food and dishes cold on the conveyor. At BLANCO Professional, you'll always find sophisticated solutions for a continuous cooling chain and maximum hygiene for Cook & Chill.

Quick and effective cooling, even for large quantities.

Another component for your continuous cooling chain: instead of the dispensers with cooling slits, you use the central cooling station with matching ZKS universal dispensers. They offer reliable dish cooling and refrigeration of pre-portioned food. The indirectly cooled universal dispensers then transport the dishes for destacking or the pre-portioned food to the conveyor.

COOLING STATIONS

The easy way to keep cool with the powerful cooling stations for cooling dishes and refrigerating food – both before and during portioning.

The perfect partners for portioning: the cooling stations by BLANCO Professional with the precisely aligned shelf trolleys or universal dispensers ensure the HACCP-compliant temperatures of food and dishes, even outside of cooled rooms.

The cooling stations are available either with active, integrated convection cooling, or for connection to a customer-supplied refrigeration system.

KS-UK cooling station for RWR 3 KS and RWR 3-A KS shelf trolleys

For maintaining the cold temperature of food in containers which is prepared for portioning on the conveyor.

- Active convection cooling
- All GN containers, including those hung on the shelf trolley, are gently and effectively cooled through a cold-air curtain
- With 2 insulated doors to prevent cold loss
- Cooling temperature adjustable down to the degree
- Simple and safe rolling in and out of shelf trolley thanks to roll-in aids

KS-UK cooling station for RWR-VP 163 KS shelf trolley

For maintaining the cold temperature of food to be portioned on the conveyor and pre-portioned food (e.g. salads, desserts in bowls or dishes).

- Active convection cooling
- With cooled air curtain on the front to prevent the exchange of air between the cold air in the cooling station and the warm air in the room
- Cooling temperature adjustable down to the degree
- Safe rolling in and out of shelf trolley thanks to roll-in aids

KS-UK RWR 3-A cooling station with RWR 3-A KS roll-in shelf trolley

The dynamic duo for maintaining the cold temperature of food in containers prepared on the conveyor.

We will be happy to provide you with free, additional information on these products and on the entire BLANCO product line on request (see back for address).

CONVEYORS FOR PORTIONING

And action! Our food distribution conveyors are the icing on the cake for your workflow.

The distribution conveyor is the heart of your portioning work process. When it runs smoothly, you can enjoy significant savings in both time and costs.

Whether as a flat-belt or round-belt conveyor, three or thirteen metres long or with active convection cooling: meticulously made of rugged stainless steel, all conveyors from BLANCO Professional offer you the best conditions for easy cleaning and optimal hygiene.

No more irksome stops: the speed of the conveyors by BLANCO Professional can be easily adapted to your staff and portioning process. This means that you can optimise your portioning process whilst minimising annoying downtimes and stoppages.

Practical accessories such as additional socket outlets, foot switches or tables that can be folded or swivelled help you to adapt the conveyor to the requirements of your company.

Portioning at a pleasant room temperature

The RSPV-UK food distribution conveyor with active convection cooling. For optimal temperature safety when portioning without cooled rooms.

The choice is yours

Whether you prefer a flat-belt or a round-belt conveyor: the sensor limit switch at the end of the conveyor and the emergency-stop buttons at the beginning and end of the conveyor ensure safety during operation. Additional switches can be added as an option.

Practice-oriented accessories

The swing-out table for patient cards or the practical folding table can be added to the beginning or end of the conveyor as an option.

**A constant conveyor of benefits:
The RSPV-UK food distribution
conveyor with convection cooling.**

The RSPV-UK food distribution conveyor with convection cooling enables continuous maintenance of the cooling chain during cold portioning at a pleasant room temperature. The cooled air curtain keeps the food on the conveyor

at an ideal temperature and guarantees simple cold portioning whilst ensuring compliance with HACCP regulations. Cleaning is equally practical: the side panelling and ventilation grate are easy to remove without tools.

Always ready, even without cooling

With the convection-cooled RSPV-UK distribution conveyor, conveyor operation and cooling can be activated independently of each other. This also enables energy-saving operation without cooling, for breakfast portioning, for instance.

Convection cooling for maximum safety

On the RSPV-UK convection-cooled conveyor belt, a cooled air curtain ensures reliable compliance with the HACCP temperature regulations for food on conveyors.

Functional principle

The fan (1) draws air in and guides it through the cooler (2), which cools the air to the desired temperature. The cooled air is then guided upwards on the other side through the ventilation grate (3). This creates a permanently cooled air curtain, which is capable of keeping food on the round-belt conveyor (4) at HACCP-compliant temperatures.

A well-rehearsed team makes your work easier.

All dispensers are part of the BLANCO system for quality-conscious, efficient food distribution. For more information, please visit www.blanco-professional.com or consult your specialist trade partner.

**CE-UK 53/53 basket dispenser
with convection cooling**

Basket dispensers

Perfect for use in food distribution: the basket dispenser with high-performance convection heating or convection cooling. Of course, the high-quality basket dispensers are also available unheated or with cooling slits. Like on all BLANCO Professional dispensers, the spring tension can also be adjusted to the weight of the dish and/or system parts.

**UNI-H 58/58 universal dispenser
with convection heating**

Universal dispensers

The variable dispensers are available either unheated, or with convection heating or cooling slits. The universal dispensers are equipped with synthetic guide rods for careful stacking of a wide range of dishes – this effectively prevents the porcelain from being worn.

The plate dispenser for everything

Round or rectangular, large or small – the new square plate tubes can take on anything. Because of the practical hole pattern, they can be adjusted to fit almost any dish shape quickly and easily. Using additional plate guides, you can even store up to four stacks of small bowls, large bowls or plates in a single tube.

STRONG SUPPORT

The tray transport trolleys by BLANCO Professional – for safe and hygienic food distribution in the tray system.

The new tray transport trolleys (TTW) from BLANCO lend a supportive hand. Seamlessly deep-drawn support ledges help you to stock and empty trays quickly. Four extra-long push handles offer an ergonomic handle height for every member of the team, thus ensuring easier pushing, pulling, manoeuvring – regardless of body height and even with open doors. The high-quality design ensures ideal hygiene with effortless cleaning. This saves valuable time.

Four ergonomic push handles

The large handle diameter make transport easier – regardless of which direction they're headed.

Extra-wide, all-round bumper rail

Protection for trolleys, furniture and hands when pushing through narrow halls and doors.

BLANCO serving trolleys: unsurpassed quality and stability.

First-class processing for a long operating life. BLANCO serving trolleys are processed to a high standard and guarantee maximum stability, load-bearing capacity and manoeuvrability even during peak service.

The serving and clearing trolleys are available in all sizes and with 2, 3, 4 or 5 shelves for large load capacities. Whether transport, temporary or longer storage, BLANCO Professional offers the ideal model for every requirement.

Firmly connected.

Perfectly welded, continuous seams connect and stabilise tube frames and shelves. This ensures a good hold.

Sturdy and safe.

Curled edges and a large, deep-drawn profile edge not only make the shelves super sturdy and resilient. They also prevent injuries at work.

SW 6 x 4-2 serving trolley

SW 8 x 5-3 serving trolley

SW 10 x 6-3 BASIC serving trolley

We will be happy to provide you with free, additional information on these products and on the entire BLANCO product line on request (see back for address).

THE BLANCO PROFESSIONAL GROUP.

Our clients are as diverse and varied as our portfolio. In order to ensure we do our very best for every client, we concentrate our skills, abilities and capacities in four highly specialised business units: Catering – Products and systems for professional commercial kitchens. Medical – Functional medical furniture for clinics, medical practices and outpatient departments. Industrial – Custom-made high-precision pieces using stainless steel, aluminium or synthetics for industry. And Railway – Equipment for galley kitchens and bistros on high-speed trains.

All of BLANCO Professional's divisions have DIN EN ISO 9001:2008 certification, guaranteeing a high standard of reliability and customer orientation.
